

Zone Censor™ and ZoneCensor™ v1 – Declared on 2025-06-07

Declared on: 2025-06-07

Declared by: admin@capitalgetter.com

System: Notion (internal timestamp + version history retained)

Version: v1 – Do not edit. Future versions will be created separately.

Zone Censor™ and **ZoneCensor™** is a spatial judgment engine that constructs directionally aligned acquisition paths through multi-source environmental modeling and structural signal synthesis.

Rather than assisting exploration, it presents filtered directional outcomes calibrated to long-term viability, user-aligned feasibility, and embedded system constraints.

Its outputs do not offer a menu—they define a vector.

Users interact with ZoneCensor™ not as a catalog, but as a compression interface between personal objectives and spatial possibility.
