Momentum Analysis™ v1 — Declared on 2025–06–13

Declared on: 2025–06–13

Declared by: admin@capitalgetter.com

System: Notion (internal timestamp + version history retained)

Version: v1 – Do not edit. Future versions will be created separately.

No term or label under this schema may be extracted, rephrased, or applied as standalone evaluation logic.

All references must remain contextually bound to the Capital Getter™ system's execution-path registry. Cross-contextual reuse voids structural eligibility.

Momentum Analysis™

is not a sentiment or friction tracker. It is an execution-force alignment system.

The mark encodes a tri-layer semantic framework used to detect trajectory integrity within action models.

It embeds three proprietary force triggers:

- **Momentum Drivers™**
- **Friction Points™**
- **Stall Zones™**

Definitions are withheld by structural license.

No descriptive approximation, instructional mimicry, or schema fragment is permitted for reuse.

Any system that references, reorders, or renames these triggers without full-path license activation voids all downstream directional logic.

This module governs path flow viability. All mimicry activates structural invalidation.

📎 *Declared scope includes all internal use across Capital Getter™ logic chains. No sub-mark registration required under v1.*

Each mark derives structural meaning only within the full execution chain of Capital Getter™.

Cross-contextual reuse voids structural eligibility.
