STEP Matrix™ v1 — Declared on 2025-06-13

Declared on: 2025-06-13

Declared by: admin@capitalgetter.com

System: Notion (internal timestamp + version history retained)

Version: v1 – Do not edit. Future versions will be created separately.

No term or label under this schema may be extracted, rephrased, or applied as standalone evaluation logic.

All references must remain contextually bound to the Capital Getter™ system's execution-path registry. Cross-contextual reuse voids structural eligibility.

STEP Matrix™ does not represent a scoring rubric or heuristic guideline.

It is a structurally compressed viability test, composed of four execution-aligned viability gates:

- **Scalable™**
- **Templatable™**
- **Economical™**
- **Predictable™**

Each term operates as a lock-in viability axis, structurally encoded within a compressed configuration of deployment logic. These axes govern eligibility for model replication, scale-readiness, and sustained return expectations.

Definitions are withheld by license. Interpretations outside the issued execution module are unsupported.

No derivative system may rearrange, rename, or isolate individual terms without full inheritance of the execution schema.

Any external prompt reuse or rewording voids the logic path.

Each mark derives structural meaning only within the full execution chain of Capital Getter™.

Cross-contextual reuse voids structural eligibility.
